Forecast for Tuesday 08 Dec 2020

Weather: Outbreaks of rain will soon spread across the Brecon Beacons this morning, these will be wintery on high ground to begin with but as freezing level rises it will become increasingly rainy. Rain will be more persistent for a time in the afternoon becoming lighter and more showery in the evening.

Chance of cloud free mountain/hill tops above 600m: 60% in the morning but becoming 20% in the afternoon as low cloud becomes quite extensive above 3-400m.

Visibility: Good at first but soon falling moderate or poor for the rest of the day, in any wintery weather it will be very poor.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

As freezing level rises on Tuesday there will be some snowmelt from 5-800m in addition to the rainfall which may cause watercourses to swell. Feeling cold on the hills in strong westerly winds.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Mon 07 Dec 2020	0.2mm	3mm	7.6mm

Forecast for Wednesday 09 Dec 2020

Weather: Perhaps some light rain before dawn but then a mainly dry and bright day, perhaps some early mist and fog in prone spots and an early frost is likely. There may be the odd shower and some rain spreading in from the west by the evening.

Maximum wind: Northwesterly backing southerly 10-15mph increasing 20-25mph later.

Chance of cloud free mountain/hill tops above 600m: 90% chance of cloud free tops, perhaps some low cloud shrouding the tops around dawn.

Visibility: Good or very good becoming poor later in rain.

Temperature: **Valleys:** Plus 5 Celsius.
At 600m: Plus 2 Celsius
Freezing level: 900m
